

SL

A vehicle adapted for
the needs of fast deliveries
and passenger transport.

SL

Key features

- The curtainsider body is the most popular body type used in commercial trucks. It is a lightweight structure that does not overload the vehicle;
- This type of body allows the truck to be used in a wide range of applications. Its light construction ensures versatility without compromising payload;
- Very large cargo space – generous loading area with considerable height;
- Easy loading and unloading thanks to convenient access from the rear or the side;
- Easy to clean – both the cargo area and the tarpaulin can be pressure-washed;
- Comfortable and ergonomic cabin designed for driver convenience;
- Maximum load space thanks to a compact and space-efficient cab design
